

I

In December 2009, PRINTCORP applied for and received the FSC chain of custody certificate, Code FC-COC-643027. We are proud to be the first and so far the only FSC certified printing company in the former Soviet Union. FSC certification gives our company access to highly environmentally sensitive markets (US, UK and some EU countries), and we are ready to prove we are in full compliance with the highest social and environmental standards in the market.

The FSC system ensures that forest products are verified from the forest of origin through the supply chain. The FSC label comes with the guarantee that our products come from responsibly harvested sustainable and verified sources.
